

Rails Decal: Project 1 Submission

* Required

Your Full Name *

Siddharth Iyer

Question 0: Why is this error being thrown? *

This is because the Pokemon model does not exist.

Question 1: How are the random Pokemon appearing? What is the common factor between all the possible Pokemon that appear? *

The random Pokemon are appearing due to the 'sample' method in the home_controller. The common feature is that, for all of them, trainer is nil.

Question 2a: What does the following line in the help text do? Be specific about what "capture_path(id: @pokemon)" is doing. If you're having trouble, look at the Help section in the README. *

```
<%= button_to "Throw a Pokeball!", capture_path(id: @pokemon), :class => "button medium", :method => :patch %>
```

It tells rails to go to the URL of the Pokemon to 'capture' it, after which rails routes it to the capture method as described in routes.rb.

Question 2b: Change the URI pattern of the capture_path from "capture" to "asdf" in your

routes.rb. Try capturing another Pokemon. Why does the route still work? *

Remember, the URI pattern is the string following the request type in the route. For instance for a route "GET 'pokemons'", the URI pattern is 'pokemons'.

This is because 'asdf' just acts like a variable.

Question 3: What would you name your own Pokemon? *

:D

Pablo Pikoski

Question 4: What did you pass into the redirect_to? If it is a path, what did that path need? If it is not a path, why is it okay not to have a path here? *

trainer_path(@pokemon.id) (with appropriate care taken if pokemon dies).

Question 5: Explain how putting this line "flash[:error] = @pokemon.errors.full_messages.to_sentence" shows error messages on your form. *

Hint: Take a look at views/layouts/application.html.erb. What does this file do, and what is it rendering? If you need to learn more about application.html.erb, Google is your friend!

Give us feedback on the project!

This isn't required however it would really help us for future iterations of the DeCal! Let us know what you liked about the project and what didn't work so well, and maybe ideas for how we could do better :)
